FOR IMMEDIATE RELEASE

Ripley Honored by 2020 Cabling Installation & Maintenance Innovators Awards

Cromwell, Connecticut – Ripley Tools, LLC. – Ripley Tools announces that the Miller® MB07 RocketRibbon™ 1728 Cable Slitter was recognized among the best in the industry by the 2020 Cabling Installation & Maintenance Innovators Awards. The stellar third-party judging panel included cabling and communications system specifiers, designers, integrators, and managers with vast professional experience.

Ripley Tools was recognized as a Silver honoree.

“On behalf of the Cabling Installation & Maintenance Innovators Awards, I would like to congratulate Ripley Tools on their Silver-level honoree status,” said Cabling Installation & Maintenance’s Chief Editor Patrick McLaughlin. “This competitive, unbiased program celebrates the most original and innovative products in the Industry.”

Ripley’s MB07 is an innovative cable slitter engineered with a precision factory-set blade depth that quickly and easily accesses fiber subunits and ripcords in Corning RocketRibbon™ 1728 cables. It efficiently performs ring and longitudinal cuts on cable mid-spans or ends without the need for blade adjustment. A single brass guide wheel reduces lag during longitudinal cutting operations. Additionally, its ergonomic handle provides greater leverage during ring cuts, and a convenient finger grip provides comfortable hand positioning during longitudinal cuts.

###

About Cabling Installation & Maintenance

Bringing practical business and technical intelligence to today's structured cabling professionals.

For over 20 years, Cabling Installation & Maintenance has provided useful, practical information to professionals responsible for the specification, design, installation, and management of structured cabling systems serving enterprise, data center and other environments. These professionals are challenged to stay informed of constantly evolving standards, system-design and installation approaches, product and system capabilities, technologies, as well as applications that rely on high-performance structured cabling systems. Our editors synthesize these complex issues into multiple information products. This portfolio of information products provides concrete detail that improves the efficiency of day-to-day operations and equips cabling professionals with the perspective that enables strategic planning for networks' optimum long-term performance.

About Ripley Tools

Since 1936, Ripley Tools has been proudly designing, manufacturing, and assembling quality products. Ripley is a leading manufacturer of cable preparation and testing tools for the CATV, Fiber Optic, Electrical, Home Integration, Telecom, and Utility Markets under the brands Miller®, Cabledmatic®, UtilityTool®, and ODM®.
