

MWSS Universal Messengered web slitting & shaving tool **CS05-7000**

Slitting and shaving tool engineered to separate the messenger and main cable on figure-8 coax trunk cables.

At Ripley Tools, we're passionate about our work and proud to be at the cutting edge of the cable industry. We design, create and supply the high quality tools that installers and engineers depend on every day. The patented CS05 is an evolution of the Ripley® messengered web slitting and shaving tool family, placing ease of use and safety at the heart of its design.

Designed to separate the messenger cable from the main cable on figure 8 coax trunk cables, shaving the residual web from the coax jacket to produce a round, water-tight form with a connector. It is compatible with CommScope® and Times Fiber cables, and works on cables sized 0.4-0.7".

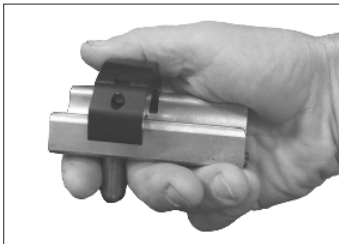

Built with user safety at the core of its design, the CS05's spring-loaded blade shield secures the blade to the tray to ensure safety during use. While the slitting blade is fixed and factory set, the shaving blade can be field-adjusted as required for each job.

Features

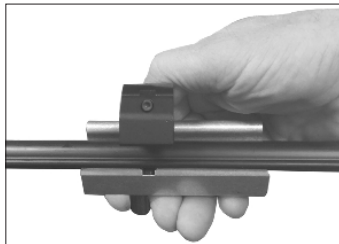

- Guarded blades for optimum safety
- Compatible with coax sizes: 320QR, 412, 500, 540QR, 565, 625, 700, 715R
- Easy to use while wearing gloves
- Suitable for messenger separation on most figure-8 fiber cables
- Slit and shave capability
- Compatible with CommScope® and Times Fiber cables
- Suitable for use on cables 0.4-0.7"
- Adjustable shaving blade
- Lightweight at 0.2kg

Part #	Item description	Cable jacket diameter	Dimensions	Weight	Replacement slitting blade	Replacement shaving blade
CS05-7000	Messengered web slitting & shaving tool	0.4 - 0.7"	3.8"x2"x1"	0.2kg	36343	37027

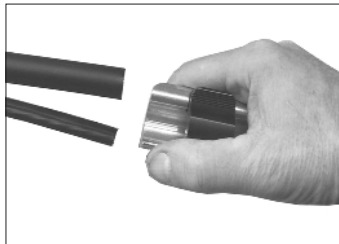

(US Patent No. 6,427,331)

Ergonomic design makes it comfortable and easy to use, even when wearing gloves.

Shaves the residual web from the coax jacket to create a round, water-tight form with a connector.

Engineered to be compatible with a range of cables, including CommScope and Times Fiber cables from 0.4"-0.7".

A guarded, field-adjustable blade provides optimum user safety and flexibility.

Invented in Ripley Labs

Make cable preparation easier with additional Ripley® products

QCST
Quick-Change
Coring, Stripping
& Chamfering Tool
with 3/8" Drill
Adapter

- Quickly strip the jacket, bevel the aluminum sheath & core the dielectric on the trunk in one precise operation.
- The quick-change, rotating body ring design conveniently attaches the jacket stripper body to the main coring & stripping tool body.
- The jacket stripper body and coring / stripping tool guide sleeve are all color coded for easy cable identification.

JCST
Jacket Coring
Stripping Tool

- Specifically designed for CommScope® QR cables, but also prepares the Alcatel Cable Benelux – ACW cable.
- Simultaneously strips the jacket, cores the dielectric, strips the aluminum sheath and trims the conductor to the proper length in one fast and precise operation.
- The heat-treated, sheath-cutting blade produces a smooth, beveled edge and can be changed without replacing the entire coring bit.

CST
Coring, Stripping
& Chamfering Tool
with 3/8" Drill
Adapter

- This combination tool quickly strips the sheath & cores the dielectric on cables in one precise operation.
- Durable, all-metal construction with color-coded guide sleeves provide easy identification.
- The heat-treated sheath cutting blade produces a smooth, beveled edge & can be replaced.

DDT
Dual Drop Cable
Trimmer

- Enables cable preparation of RG59, RG6, CT100 & CT65 coax cable (std, tri and quad) without any adjustment or blade cassette change out.
- One-step cable preparation precisely exposes the centre conductor by 7.93mm and removes the proper length of jacket at 6.35mm.
- The built-in strip stop provides precise preparation every time.
